

Blythe Diva

Your Store, Your Books, and your AI assistant DIVA — a guided tour

Welcome, Yogendra. This is your complete business platform — the online shop, the billing & inventory back-office, the wholesale portal, and DIVA, an AI assistant that runs the console for you by voice or text. Follow this tour, click the links, and try each thing.

Open your platform https://yogendra-ry342315-6737s-projects.vercel.app	Owner passcode blythe2026	Approval OTP 482913
--	-------------------------------------	-------------------------------

Tip: open it in two tabs — one as a **customer** (the shop) and one as the **owner** (the console). Keep your phone handy to feel it on mobile.

Meet DIVA — your AI store operator

DIVA sits in the bottom-right corner of every console page as a small jewelled figure. Tap her, then either press the **microphone and speak**, or **type**. She understands plain language, breaks your request into steps, does them one by one, shows each step live, and tells you when she's done. You can **Stop** her or type a new instruction at any time.

She can tell you things	"How are sales this week?" · "How is BD1004 selling?" · "What's my dead stock?" · "Tell me about the Polki Choker"
She can take you places	"Open inventory" · "Go to estimates" · "Show me the barcodes page"
She can do things	"Add 20 to BD1010" · "Hide the peacock haar" · "Generate a photo for BD1002" · "Delete BD1099" (she asks you to confirm changes first)

DIVA only ever does what your role allows — if a staff member is signed in, she's limited to their permissions. Voice works best in Google Chrome.

Part A - The shop your customers see

1. Home & shop

■ [Open the shop](#)

Do this: Scroll top to bottom.

Feel this: Premium emerald-and-gold look, categories, bestsellers with real ratings, and the reels strip.

Notice the clear search, wishlist, account and bag icons — easy for any visitor.

2. Shoppable Reels

■ [Watch the reels](#)

Do this: Tap a reel.

Feel this: Instagram reels play in Instagram's player; uploaded video clips autoplay. Tagged products show as 'Shop this look'.

To make a reel shoppable, upload a clip or paste an IG link AND tag SKUs in the console Reels page.

3. Product page & Diva concierge

■ [A product](#)

Do this: Open a product, then tap the ♦ button to ask the on-site assistant a question.

Feel this: Gallery, live price, AI description, reviews, recommendations, and a 24x7 shopping assistant.

4. Share a catalogue

■ [Catalogue](#)

Do this: Use [Copy link](#) / [Share on WhatsApp](#) / [Save as PDF](#).

Feel this: A premium, shareable catalogue — photos, SKU, price, stock, keywords. Send it to any customer in seconds.

Part B - Wholesale (trade buyers)

5. Wholesale portal

■ [Wholesale](#)

Do this: As owner: create a customer of type Wholesale, open them, click Approve (it makes a code), share the phone + code.

Feel this: Approved retailers sign in and see WHOLESale prices (no retail discounts), enter quantities, and place an order at trade rates.

This protects your margins — trade pricing only shows after you approve a buyer.

Part C - Your console (sign in: blythe2026)

6. Dashboard

■ [Dashboard](#)

Do this: Use [Today](#) / [This week](#) / [This month](#) / [Custom dates](#). Tap a channel card to expand its full report.

Feel this: Revenue, orders, stock alerts, and per-channel sales at a glance.

7. Add inventory the easy way

■ [Add Inventory](#)

Do this: Type one product, or paste a whole messy list / upload a sheet, then 'Build inventory with AI'.

Feel this: AI reads the list and creates each product live, on screen — no endless waiting. New items stay as drafts until they have a photo, so nothing unfinished shows on the shop.

You can set your own SKU or let it auto-generate.

8. Catalogue, product 360 & photos

■ [Catalogue](#)

■ [Product Photos](#)

Do this: Click Edit on any product (add variants/colours with their own stock), or 360 to see its analytics.

Upload a raw photo and Generate a model shot.

Feel this: Every product: edit details/SEO, manage colour variants, see units sold & revenue, turn a raw snap into a studio photo.

9. Billing / POS with barcode scan

■ [Billing \(POS\)](#)

Do this: Scan a barcode (or type a SKU + Enter) to add to the bill — it shows available stock. Choose GST invoice or cash memo, enter 'Amount received' for part-payments, complete the sale.

Feel this: Fast counter billing, live stock on scan, partial/advance payments with balance-due tracking, and a printable bill.

10. Estimates, invoices & payments

■ [Estimates](#)

■ [Sales Records](#)

Do this: Quote an estimate; bill it as GST or Cash; record payments later from the invoice.

Feel this: Bills carry states — Proforma / Tax Invoice / Cash Memo and Paid / Partial / Unpaid — with proper sequential invoice numbers. Every sale across all channels is in Sales Records.

11. Customers & suppliers

■ [Customers](#)

■ [Suppliers](#)

Do this: Add customers (retail/wholesale, GST, credit) — they also build automatically as you bill. Keep your sourcing book by city.

Feel this: Click a customer for their full order history and outstanding balance.

12. Inventory, barcodes, purchases

■ [Inventory](#)

■ [Barcodes](#)

■ [Purchases](#)

Do this: Print 64 barcode labels per A4 sheet. Record supplier bills. Adjust stock with a source tag (e.g. 'returned from cart').

Feel this: Deleting a purchase needs your OTP (it reverses stock) — sensitive actions are protected.

Part D - Staff, roles & passcodes

Everyone signs in at the same place: [the console login](#). What they type decides what they see. Your owner passcode unlocks everything; each staff role has its OWN passcode that opens only its permitted sections — and DIVA is limited to that role too.

Role	Passcode	Sign in with
Owner (you)	blythe2026	Full access to everything
Store Manager	3A96AB	Inventory, billing, customers (as set)
Accountant	A85AEB	Billing & books (as set)
Cataloguer	E7FAA8	Catalogue only (as set)

Manage roles & see every passcode at [/admin/roles](#) — create a role, tick exactly what it can do (e.g. a clerk who can ADD stock but never REMOVE it), and share its passcode. Hit 'Regenerate passcode' anytime.

Five things to try first

1. [Ask DIVA: 'how are sales this week?'](#)
2. [Scan/type a SKU at the counter to bill it](#)
3. [Paste a product list and watch AI build it](#)
4. [Turn a raw photo into a studio shot](#)
5. [Share your catalogue on WhatsApp](#)

Take your time and click freely — this is demo data, nothing can break. When you're happy we'll plug in your real GST number, bank details and pricing, and you're fully live.
